LinkedIn Profile

Summary: Building Scalable Solutions

Full-Stack Web Development

Proven expertise building complex platforms like AET, RTM, and Census Validator using MERN stack.

Real-Time Systems & Performance

Implemented WebSocket, Redis caching, and optimized architectures for 100+ concurrent users.

Payment & Integration Systems

Integrated Stripe, GraphQL APIs, and complex business workflows.

Scalable Cloud Infrastructure

Deployed on AWS with MongoDB, PostgreSQL, and modern DevOps practices.

Impactful, Client-Focused Solutions

Commitment to Impact

Dedicated to delivering solutions that make a real difference.

Client-Centric Approach

Focusing on client needs across diverse industries.

Education

1

COMSATS Institute of Information and Technology

Bachelor of Science - BS, Computer Software Engineering

August 2016 - August 2021

Professional Experience

AET

Full-stack Web Platform Developer

Jan 2024 - Present

Remote

SurveyAuto

Software Engineer

October 2021 - Present (4 years 3 months)

Lahore, Punjab, Pakistan

Fiverr

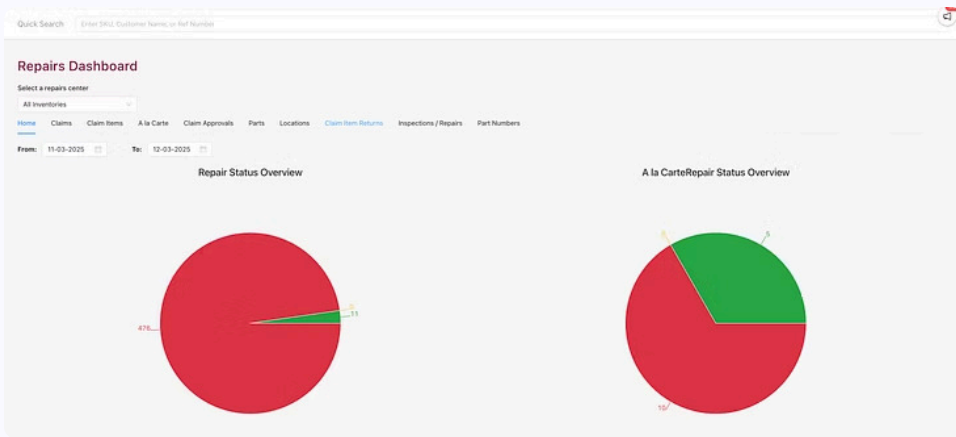

Java Software Developer

June 2017 - October 2021 (4 years 5 months)

Remote

AET Management Portal

Full-Stack Web Platform | Jan 2024 - Present

The screenshot shows the 'Customer' details page for 'Sacred Heart Stem School'. The page includes a 'Customer' section with the following information: Created At: 10/10/2025, Ref Number: L132, Payment: \$773.53, Start Date: 2025-10-15, Frequency: MONTHLY, Periods: 36, Tax Applied On: Sub Total + Adjustments, and Status: Active. Below this, there is a table with the following columns: Action, Tech Advisor, and Created At. The table contains three rows of data. At the bottom right, there is a 'Create Recurring Series' button.

Action	Tech Advisor	Created At
Invoice Created and linked to amortization Row For Period 2	Chris Chung	11/15/2025
Invoice Created and linked to amortization Row For Period 1	Chris Chung	10/15/2025
Created Recurring Series Item Name: Recurring Series Quantity: 1 Price: 773.53	Walter groffellow	10/10/2025

I helped develop the AET Management Portal, an internal system that unifies sales, procurement, inventory, accounting, IT ticketing, asset tracking, and reporting.

- Recurring Lease Automation
- Stripe Invoice Payments
- Real-Time Notifications
- Asset Tracking & IT Support

React.js • Node.js • PostgreSQL • AWS • Stripe API

Key Skills

PostgreSQL

Robust relational database management.

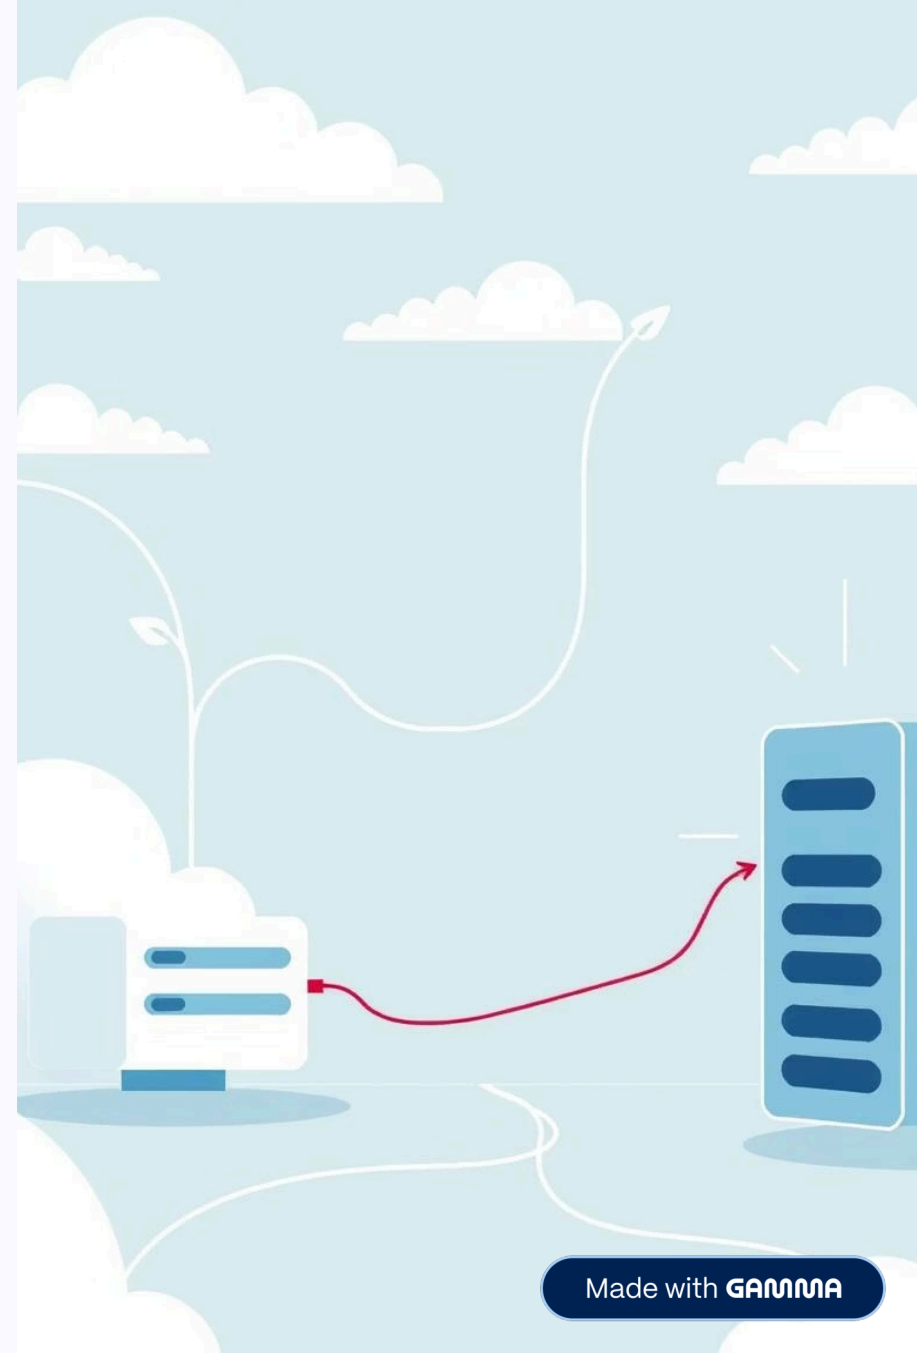

Stripe (Software)

Seamless payment processing integration.

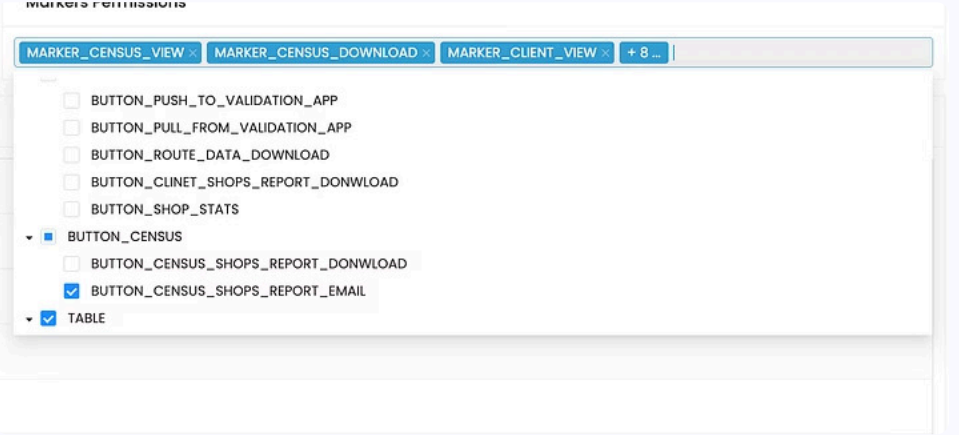

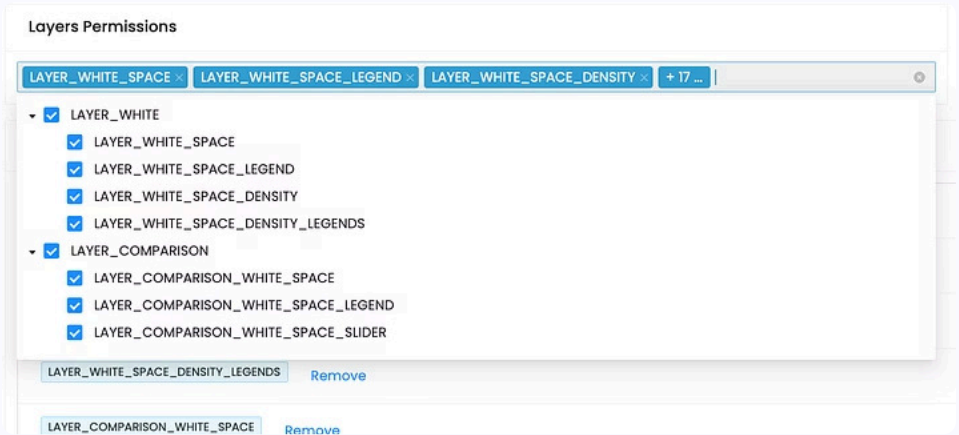

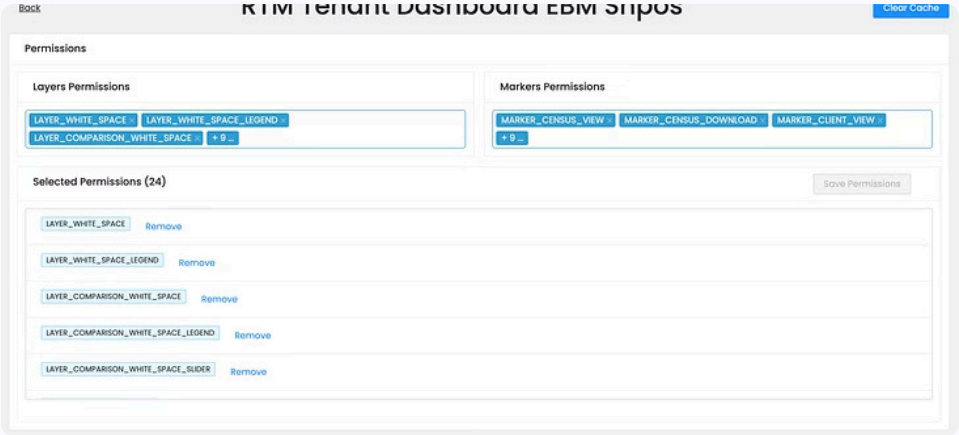

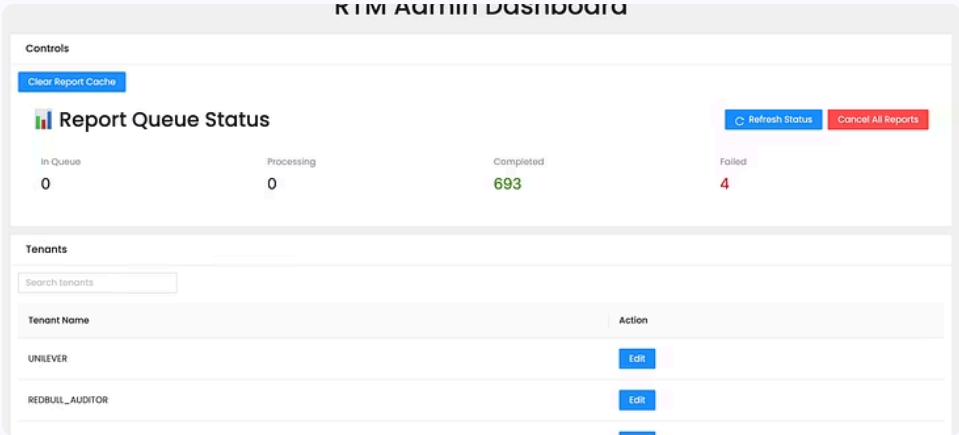

Apollo GraphQL

Efficient data querying and management.

RTM Admin Portal

Administrative Management & Configuration | Jul 2022 - Present

The RTM Admin Portal provides comprehensive management tools for administrators to control user access, configure system settings, and customize reporting features for end users.

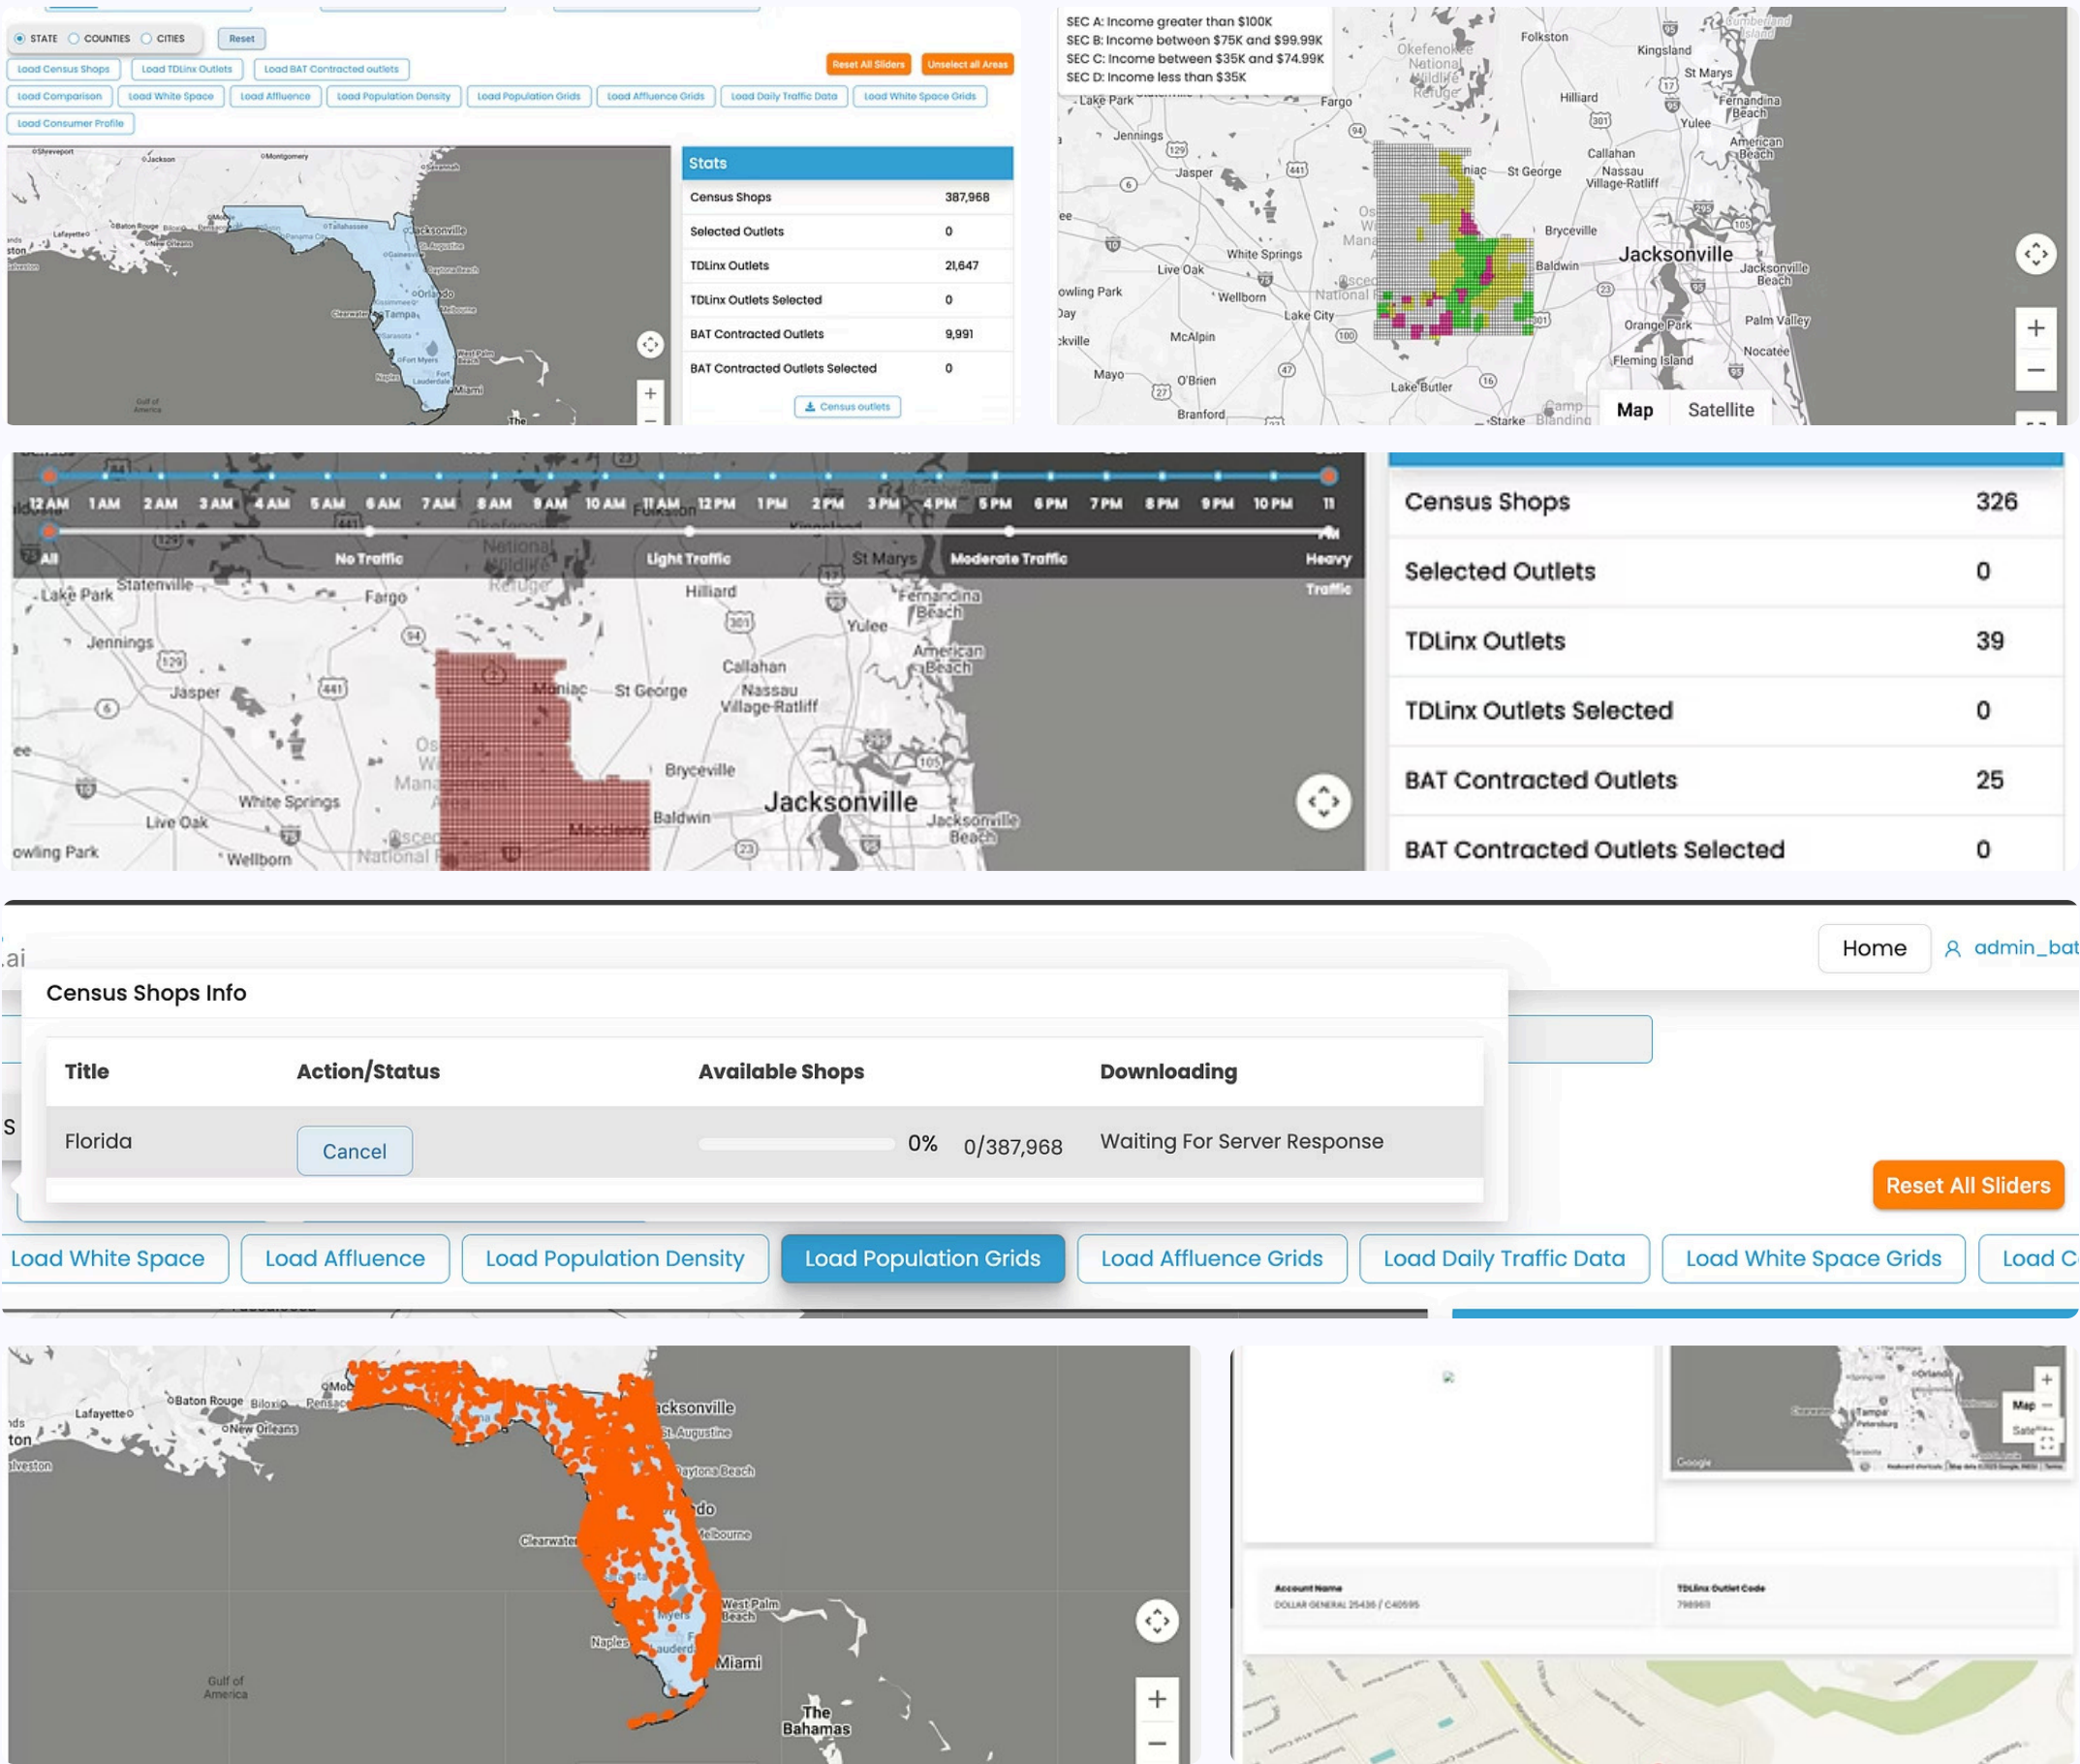

Key Features:

- User Permission Management
- Report Configuration & Customization
- Column & Data Visibility Control
- Filter Management for User Roles

React.js • Node.js • MongoDB • Redis • Ant Design (AntD)

RTM User Portal

Serving 100+ Active Users | Route Optimization & Analytics | Jul 2022 - Present

The RTM User Portal empowers businesses with intuitive tools to optimize their sales routes, visualize outlet locations, and track performance metrics in real-time to maximize sales efficiency.

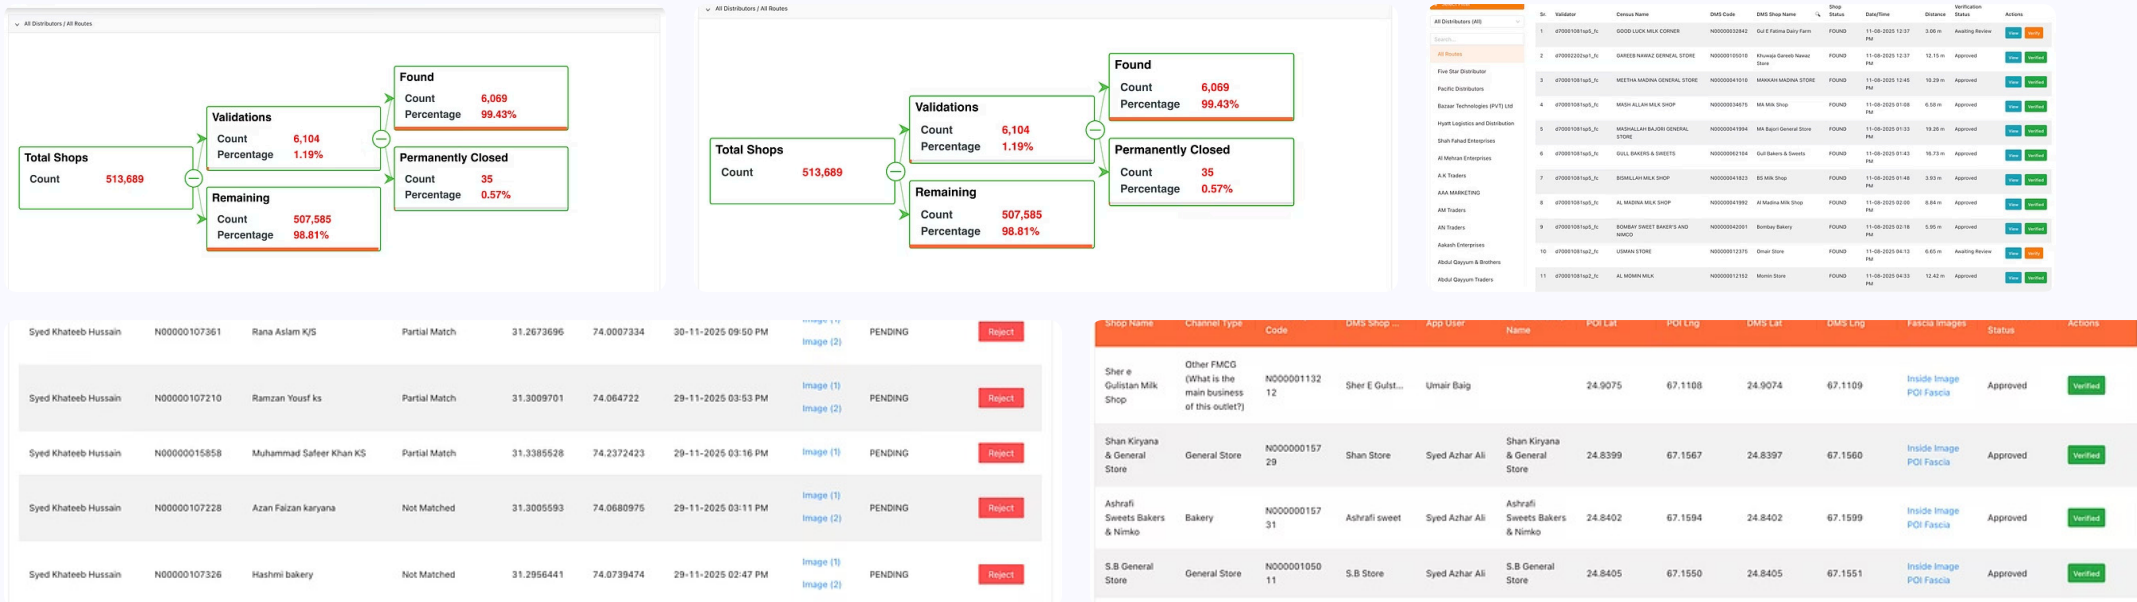

Key Features:

- Interactive Route Mapping
- Sales Performance Analytics
- Outlet Management & Filtering
- Geographic Visualization & Heat Maps

React.js • Node.js • MongoDB • Redis • Ant Design (AntD)

Census Validator

Data Validation & Quality Control Portal | Feb 2022 - Present

Census Validator is a project developed to validate shop data submitted by field users working for SurveyAuto. The project is designed to improve the accuracy and completeness of data collected by field users, ensuring reliable and up-to-date information.

Key Features:

- Custom Search & Filtering
- Data Comparison Tools
- Automated Error Detection
- Data Visualization & Analytics

React.js • Node.js • MongoDB • Ant Design (AntD) • Amazon Web Services (AWS)

Web Application Development

MERN Stack Mastery

Full-stack development with React, Node.js, MongoDB, and Express for complex applications.

RESTful & GraphQL APIs

Designing scalable APIs with Apollo GraphQL and REST principles for seamless data exchange.

Database Design

Expertise in PostgreSQL, MongoDB, and Redis for optimal performance and scalability.

Real-Time Features

WebSocket implementation for live notifications and real-time data synchronization.

Problem Solving & Innovation

Analytical Problem-Solving

Breaking down complex requirements into scalable technical solutions.

Performance Optimization

Identifying bottlenecks and implementing efficient solutions (Redis caching, query optimization).

User-Centric Design

Creating intuitive interfaces that solve real business problems.

Continuous Improvement

Iterating on solutions based on feedback and metrics.

Continuous Learning

Latest Technologies

Staying updated with modern frameworks, tools, and best practices in web development.

Industry Trends

Following emerging patterns in cloud infrastructure, DevOps, and system design.

Skill Diversification

Expanding expertise across frontend, backend, database, and DevOps domains.

Community Engagement

Learning from open-source projects and industry communities.

Let's Connect & Collaborate

Open to discussing new opportunities and exciting projects
